

## **Speereo Software UK has launched Speereo Mobile Travel Service for mobile devices**

**London – May 23, 2006**

Speereo Software UK has launched Speereo Mobile Travel Service for mobile devices on May 23 2006. Speereo Mobile Travel Service is a unique service that is targeted on traveling mobile phone users.

This solution was made in cooperation with OAG, that provides online flight timetable and online flight status services. OAG is a global content management company with focus on travel and transport, that holds flight details for 1000 airlines and more than 3000 airports. The service will meet information requirements for business and leisure travelers.

Speereo Mobile Travel Service is a complete solution for active users of smartphones and Pocket PCs.

**Speereo Mobile Travel Service** includes:

### **ü Speereo Voice Translator**

Speereo Voice Translator is a phrase book, which includes about 4,000 most commonly used phrases including business, technical, medical and legal terms, colloquial phrases, idioms, and slang. Once you select the proper phrase in one of the provided 11 Asian and European languages, Speereo Voice Translator immediately reads back the same phrase in the other language.

### **ü General travel and interest guides**

Using travel guides, you will have all necessary information for travelers at hand, including the following topics about the country which you are going to visit: General Information, Contact Addresses, Passport/Visa, Money, Duty Free, etc. Interest Ski guide describes 61 main resorts in 8 countries. Users can find various info such as location, skiing details, accommodation, restaurants, information about arriving and top events. We have all useful information in our guides!

### **ü Online flight timetable (provided by OAG)**

Online flight timetable is a service that provides info about hundreds of thousands of direct and connecting flights worldwide. We have at hand all the flights details including the Low Cost Carriers is available in our service. All you have to do is to indicate your flight destination and the service will show you all relevant flights.

### **ü Online flight status (provided by OAG)**

The online flight status is an online service that provides direct info about flight changes: it identifies a delay, cancellation, terminal gate change, and baggage information. Now travelers don't need to worry about being too early in the airport, or too late for boarding as well as baggage troubles.

### **ü Online world weather**

Using the service, traveler can check the online forecast and current weather conditions in selected cities around the world.

All the above information is brought together in one product with the user-friendly interface.

### **About OAG**

**OAG is a global travel and transport information company.**

We have three core activities:

- managing and distributing information within the passenger and cargo aviation sectors
- providing travel information to business travellers
- providing advertising and promotion opportunities for the aviation and travel communities.

Our business is underpinned by our data management expertise. We hold a breadth of travel related content and are best known for our airline schedules database. This holds future and historical flight details for 1,000 airlines and more than 3,500 airports. Every ten seconds a flight is updated on the OAG system. Over the coming year we are tracking around 27 million departures.

Using these vast databases, we provide a broad range of multi-lingual products for business and consumer customers, available in virtually any way the customer wants it: Internet, PDA, mobile, digital and print.

We provide a suite of solutions for managing, distributing, displaying and analysing passenger and cargo flight data. These include data files; internet timetables; flight analysis tools; flight status displays and SMS alert services for airports, airlines and travel-related web sites.

Our activities span both passenger and cargo. In the cargo area additional services include airfreight rates and messaging services.

We are a private company with 400 employees based in 9 offices in Europe, the Americas and Asia.

More information about our company, our products and our services is available on our web sites [www.oag.com](http://www.oag.com), [www.oagdata.com](http://www.oagdata.com), [www.oagcargo.com](http://www.oagcargo.com) and [www.inforwarding.com](http://www.inforwarding.com)
