

Speereo launches Voice Translator 2.1 for Pocket PC

St. Petersburg, Russia – July 1, 2005 - Speereo Software launched Speereo Voice Translator 2.1. This is a new improved version of popular speech product designed for Pocket PC and Pocket PC based smartphones. Speereo offers this product as a complete solution for travelers. The main attractive feature of this product is the ability to understand a spoken word.

Once the user pronounce the phrase in English, Speereo Voice Translator immediately reads back the same phrase in one of other languages (Spanish, German, French, Italian, Russian, Chinese and Japanese).

About 4,000 most commonly used phrases, business, technical, medical, and legal terms, conversational phrases, idioms, and some slang are arranged in 16 main categories and 87 subcategories by subject, such as Travel, Useful, City, Buy Food, Shopping, Health and Entertainment.

The customers will enjoy the best world travel guides! Speereo Voice Translator has been enhanced by the Columbus Travel Guides on every country and many cities, which had been especially adapted for Speereo Voice Translator. Columbus Travel Guides is an invaluable source of comprehensive and detailed information for countries and cities worldwide. Now, wherever going, with Speereo Voice Translator powered by Columbus Travel Guides the customers will have at hand all useful information on the place of their visit, including sights, hotels, restaurants etc.

This version is fully compatible with WindowsMobile 2003 Second Edition. Shopping, Food, and Sport topics were enriched. Some of improvements in graphic interface were implemented. Users can expect from this version traditionally very accurate speech recognition, user friendly interface, and of course a lot of useful information for travelers, since the product comes with Columbus travel guides.

About Speereo Software UK, Ltd.

Speereo Software is a British IT company involved in the development of proprietary speech technologies. Speereo Software has brought together engineers, mathematicians, and programmers experienced in the area of speech processing. Currently we employ 98 people in the company. Now the work on the speech recognition technology embodies 150 person-years. Thus far R&D has been financed internally by revenue generated from IT consulting.
