

Speereo Software UK introduced Speereo Mobile Travel Service at CTIA Wireless 2006 in Las Vegas, Nevada USA

St. Petersburg, Russia – April 13, 2006

Speereo Software team successfully participated in CTIA Wireless 2006 - the worldwide event that brings together the mobile content providers, wireless carriers and manufacturers. The exhibition was held in Las Vegas, Nevada USA (April 4-7, 2005). The attention of visitors was attracted to Speereo Mobile Travel Service. The service includes Speereo Voice Translator, basic travel guides and interest guides, online flight timetable, online flight status and online weather reports. All the above is combined in one product with the user-friendly interface.

Users may access the service via their mobile devices running on Windows Mobile and Symbian OS. There are popular smartphones from the worldwide leading manufacturers such as Nokia, Sony Ericsson, Motorola and Pocket PC devices among supported devices.

Speereo Mobile Travel Service is a complex solution that is targeted on traveling users of mobile phones. This service should satisfy the information requirements of frequent business and leisure travelers.

The service has been developed on basis of the core software product for mobile phone – Speereo Voice Translator.

The Speereo Voice Translator product is developed as a voice phrase translator for the common used phrases. It is highly convenient, when being abroad, one has an opportunity to talk to native speakers in their classic native language. Once you select the proper phrase in one of the provided 11 languages (English, Chinese, Japanese, Korean, Turkish, Portuguese, French, German, Spanish, Italian, Russian), Speereo Voice Translator immediately reads back the same phrase in the other language through the mobile phone loud speaker.

About Speereo Software UK, Ltd.

Speereo Software is a British IT company established in 1998 and involved in the development of proprietary speech technologies. Speereo Software has brought together engineers, mathematicians, and programmers experienced in the area of speech processing. Currently we employ 130 people in the company.
